

Assignment 4A

Value & Color A - complete fictional submission example

This packet demonstrates organization and completeness only. It is digitally illustrated, not physical paint work. Create and photograph your own measured paint swatches; do not submit this file or copy its color formulas.

Example identification block

Value & Color A
Your Full Name
Fall 2026 - October 5, 2026

What the finished upload must show

- An 8.5 x 11 inch PDF or Word document with a filename such as value-color-A-Lastname-Firstname, plus the title, full name, semester/year, and date.
- Eight different hues, each presented at three values, for 24 large mixed swatches total.
- For every value: four uniform measured formula squares and a nearby larger mixed-result square.
- Value 1 uses two dabs of color A plus two dabs of color B; Value 2 replaces one dab with white; Value 3 replaces one dab of each color with white.
- Physical, water-based paint work on suitable paper, photographed/scanned clearly and presented cleanly.

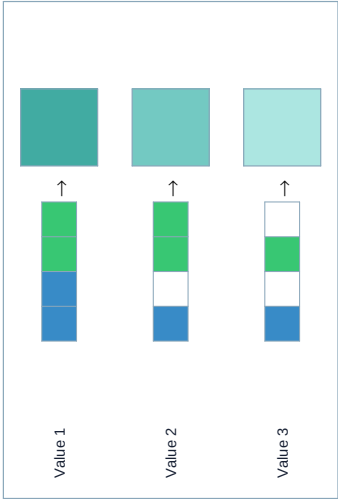

Example page order

Page 1: identification and checklist. Pages 2-5: two hue groups per page, with three values per group. This makes all 24 graded values easy to count.

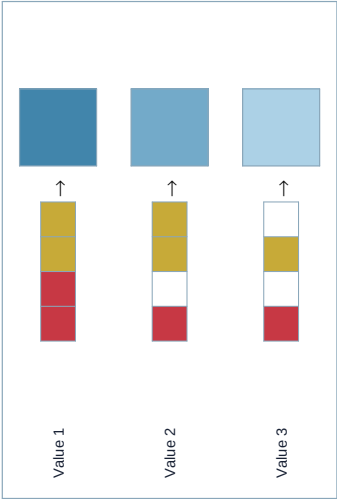

24 values - example organization (1-6 of 24)

Each formula has four equal small squares. The larger square shows the blended result.

Hue 1: two-color mixture

Hue 2: two-color mixture

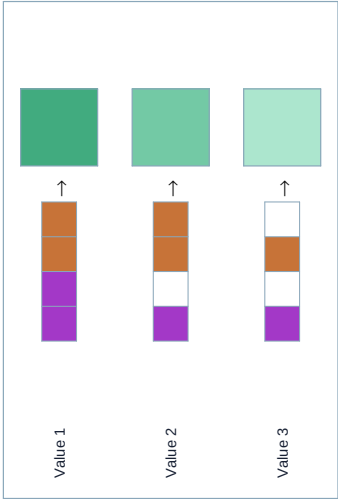

Before uploading

- Count 24 large mixed swatches.
- Confirm all formula squares and mixed results are legible.
- Confirm title, name, date/term, filename, page size, and clean presentation.

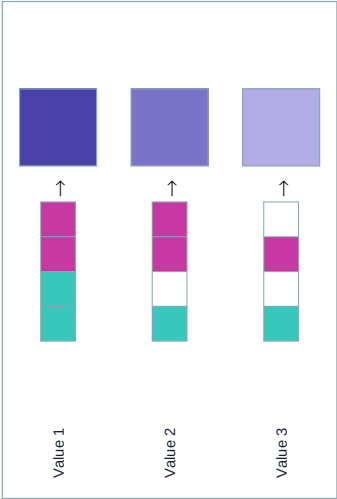

24 values - example organization (7-12 of 24)

Each formula has four equal small squares. The larger square shows the blended result.

Hue 3: two-color mixture

Hue 4: two-color mixture

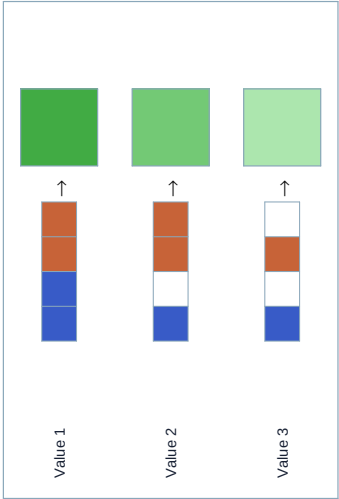

Before uploading

- Count 24 large mixed swatches.
- Confirm all formula squares and mixed results are legible.
- Confirm title, name, date/term, filename, page size, and clean presentation.

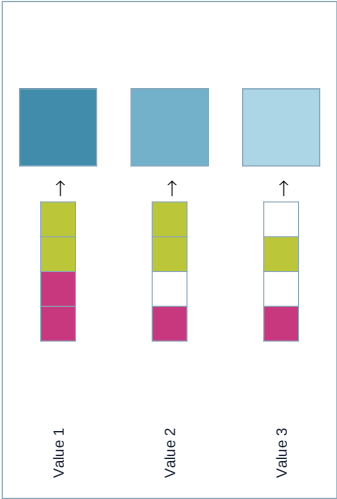

24 values - example organization (13-18 of 24)

Each formula has four equal small squares. The larger square shows the blended result.

Hue 5: two-color mixture

Hue 6: two-color mixture

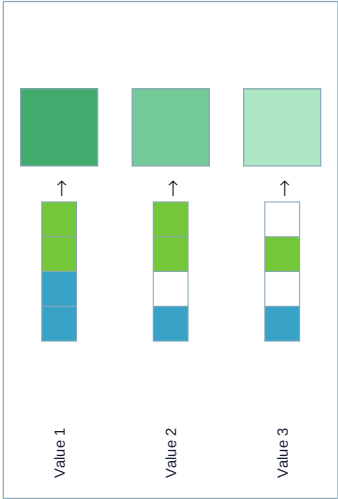

Before uploading

- Count 24 large mixed swatches.
- Confirm all formula squares and mixed results are legible.
- Confirm title, name, date/term, filename, page size, and clean presentation.

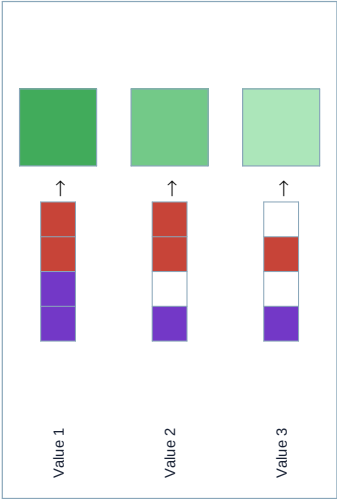

24 values - example organization (19-24 of 24)

Each formula has four equal small squares. The larger square shows the blended result.

Hue 7: two-color mixture

Hue 8: two-color mixture

Before uploading

- Count 24 large mixed swatches.
- Confirm all formula squares and mixed results are legible.
- Confirm title, name, date/term, filename, page size, and clean presentation.
